Subject: ATLAS Open Enrollment Period - Extended

The Department of Drug and Alcohol Programs (DDAP) announced an -open enrollment period at the end of 2022 for licensed substance use disorder (SUD) treatment providers in Pennsylvania to submit their information to be included in the Addiction Treatment Locator, Assessment, and Standards Platform, [ATLAS](#). **This open enrollment period has been extended, and will now continue through January 13th.**

Those who can take advantage of this extension include:

1. **Facilities already included in ATLAS** to update information if there are any changes since the original enrollment. If you are already included and need to make changes to your profile information, please reach out to Shatterproof directly at ATLAS@shatterproof.org
2. **Facilities that have not submitted the treatment facility survey** to complete the survey and have their information appear in ATLAS. Shatterproof will reach out directly if your licensed SUD facility's information is not currently included on the tool. *There is a streamlined submission process for those organizations with multiple facilities.*

By completing your ATLAS survey during this open enrollment period, you ensure that the information presented in your site's profile on TreatmentATLAS.org is accurate and you also gain access to a customized portal that allows you to benchmark and compare your services against your peers. If you have any questions or need to have the treatment facility survey resent to your agency, please reach out to Angad Buttar AButtar@Shatterproof.org.
